

ICT/COMPUTING SKILLS

Information and communications technology (ICT) skills refer to one's ability to converse with people through various technologies.

Prakasam Engineering College works towards enabling the students with the modern ICT tools and making them experienced in using these tools and making them experienced in using these tools effectively. Hardware and software that are needed to train them are updated continuously. Even before technologies put into mass benefits of society, employers seek for human resources who are up to date and be available readily from the educational institutions. For example, internet of things has turned to internet of everything. The institute exports students in such areas through invited experts/ trained faculty members.

- Introduction to android development using KOTLIN
- Workshop on Word Press
- 3D printing in entrepreneurship
